3354/C

CONTENTS OF VOLUME 52

NUMBER 1, PART 1, JULY, 1968

1 David O. Carpenter and Barbara O. Alving. A contribution of an electrogenic Na^+ pump to membrane potential in *Aplysia* neurons

22 Noel L. Morlock, Daniel A. Benamy, and Harry Grundfest. Analysis of spike electrogenesis of eel electroplaques with phase plane and impedance measurements

46 Mahlon E. Kriebel. Electrical characteristics of tunicate heart cell membranes and nexuses

60 Hiroshi Kitasato. The influence of H^+ on the membrane potential and ion fluxes of *Nitella*

88 Harold Gainer. The role of calcium in excitation-contraction coupling of lobster muscle

111 Guillermo Alonso and Mackenzie Walser. ATP splitting and calcium binding by brain microsomes measured with a rapid perfusion method

136 John H. Northrop. Appearance of virulent bacteriophages in lysogenic *E. coli* cultures after prolonged growth in the presence of triethylenemelamine

144 A. B. Steinbach. Alteration by Xylocaine (lidocaine) and its derivatives of the time course of the end plate potential

162 A. B. Steinbach. A kinetic model for the action of Xylocaine on receptors for acetylcholine

NUMBER 1, PART 2, JULY, 1968

Foreword William J. Welch

General Introduction Francis P. Chinard

List of Participants

Transcapillary Exchanges

3 s Kenneth L. Zierler. Introduction

5 s Harry L. Goldsmith. The microrheology of red blood cell suspensions

29 s Curt A. Wiederhielm. Dynamics of transcapillary fluid exchange

64 s Morris J. Karnovsky. The ultrastructural basis of transcapillary exchanges

96 s Eugene M. Renkin. Transcapillary exchange in relation to capillary circulation

Models and Model Membranes

111 s Alexander Mauro. Introduction

113 s Karol J. Mysels. Dynamic processes in soap films

125 s H. Ti Tien. Black lipid membranes at bifaces. Formation characteristics, optical and some thermodynamic properties

145 s ALAN FINKELSTEIN and ALBERT CASS. Permeability and electrical properties of thin lipid membranes

173 s R. P. RAND. The structure of a model membrane in relation to the viscoelastic properties of the red cell membrane

Physical Chemistry of Interfacial Transport

189 s MARTIN BLANK. Introduction

191 s MARTIN BLANK. Monolayer and interfacial permeation

209 s I. R. MILLER. Ion transport through monolayers and interfacial films

227 s M. R. J. SALTON. Lytic agents, cell permeability, and monolayer penetrability

Transport across Cell Membranes

255 s EUGENE P. KENNEDY. Introduction

257 s EDWARD D. KORN. Structure and function of the plasma membrane. A biochemical perspective

279 s ARTHUR B. PARDEE. Biochemical studies on active transport

296 s C. R. PARK, O. B. CROFFORD, and T. KONO. Mediated (nonactive) transport of glucose in mammalian cells and its regulation

NUMBER 2, AUGUST, 1968

181 F. J. BRINLEY, JR., and L. J. MULLINS. Sodium fluxes in internally dialyzed squid axons

212 GEORG H. SCHMID and HANS GAFFRON. Photosynthetic units

240 EDUARDO ROJAS and MITZY CANESSA-FISCHER. Sodium movements in perfused squid giant axons. Passive fluxes

258 ROGER ECKERT and TAKAO SIBAOKA. The flash-triggering action potential of the luminescent dinoflagellate *Noctiluca*

283 C. J. BROKAW and B. BENEDICT. Mechanochemical coupling in flagella. II. Effects of viscosity and thiourea on metabolism and motility of *Ciona* spermatozoa

300 THOMAS E. ANDREOLI and MARCIA MONAHAN. The interaction of polyene antibiotics with thin lipid membranes

326 KIYOSHI KUSANO. Further study of the relationship between pre- and postsynaptic potentials in the squid giant synapse

346 DAVID H. P. STREETEN and ARNOLD M. MOSES. Action of cortisol on sodium transport in canine erythrocytes

363 SHOSAKU OBARA. Effects of some organic cations on generator potential of crayfish stretch receptor

NUMBER 3, SEPTEMBER, 1968

389 R. A. SJODIN and L. A. BEAUGÉ. Strophanthidin-sensitive components of potassium and sodium movements in skeletal muscle as influenced by the internal sodium concentration

408 L. A. BEAUGÉ and R. A. SJODIN. The dual effect of lithium ions on sodium efflux in skeletal muscle

424 CLIFFORD L. SLAYMAN and CAROLYN W. SLAYMAN. Net uptake of potassium in *Neurospora*. Exchange for sodium and hydrogen ions

444 RUDY A. BERNARD and BRUCE P. HALPERN. Taste changes in vitamin A deficiency

465 PATRICK EGGENA, IRVING L. SCHWARTZ, and RODERICH WALTER. A sensitive hydroosmotic toad bladder assay. Affinity and intrinsic activity of neurohypophyseal peptides

482 ROBERT G. FAUST, MARY G. LEADBETTER, REGINA K. PLENGE, and ALSTON J. MCCASLIN. Active sugar transport by the small intestine. The effects of sugars, amino acids, hexosamines, sulfhydryl-reacting compounds, and cations on the preferential binding of D-glucose to Tris-disrupted brush borders

495 ROSS C. BEAN, WILLIAM C. SHEPHERD, and HAKCHILL CHAN. Permeability of lipid bilayer membranes to organic solutes

509 DONALD J. WOODWARD. Electrical signs of new membrane production during cleavage of *Rana pipiens* eggs

532 C. L. GIBBS and P. VAUGHAN. The effect of calcium depletion upon the tension-independent component of cardiac heat production

550 LETTERS TO THE EDITOR

L. J. MULLINS. A single channel or a dual channel mechanism for nerve excitation

TOSHIO NARAHASHI and JOHN W. MOORE. A single or dual channel in nerve membranes?

L. J. MULLINS. Single or dual channel mechanisms. A further comment

NUMBER 4, OCTOBER, 1968

559 HIROMICHI MORITA and AKIO SHIRAISHI. Stimulation of the labellar sugar receptor of the fleshfly by mono- and disaccharides

584 ALAN R. ADOLPH. Thermal and spectral sensitivities of discrete slow potentials in *Limulus* eye

600 G. O. MACKIE and L. M. PASSANO. Epithelial conduction in hydromedusae

622 ARSELIO P. CARVALHO. Calcium-binding properties of sarcoplasmic reticulum as influenced by ATP, caffeine, quinine, and local anesthetics

643 ROBERT L. DEHAAN and SHELDON H. GOTTLIEB. The electrical activity of embryonic chick heart cells isolated in tissue culture singly or in interconnected cell sheets

666 BILLY K. YEH and BRIAN F. HOFFMAN. The ionic basis of electrical activity in embryonic cardiac muscle

682 G. A. LANGER and A. J. BRADY. The effects of temperature upon contraction and ionic exchange in rabbit ventricular myocardium. Relation to control of active state

NUMBER 5, NOVEMBER, 1968

717 MATHEW ALPERN and SHUKO TORII. The luminosity curve of the protanomalous fovea

738 MATHEW ALPERN and SHUKO TORII. The luminosity curve of the deuteranomalous fovea

750 A. WEBER and R. HERZ. The relationship between caffeine contracture of intact muscle and the effect of caffeine on reticulum

760 A. WEBER. The mechanism of the action of caffeine on sarcoplasmic reticulum

773 S. HAGIWARA, R. GRUENER, H. HAYASHI, H. SAKATA, and A. D. GRINNELL. Effect of external and internal pH changes on K and Cl conductances in the muscle fiber membrane of a giant barnacle

793 CARLO CAPUTO. Volume and twitch tension changes in single muscle fibers in hypertonic solutions

810 WALLACE O. FENN and ROBERT E. MARQUIS. Growth of *Streptococcus faecalis* under high hydrostatic pressure and high partial pressures of inert gases

825 C. M. GARY-BOBO and A. K. SOLOMON. Properties of hemoglobin solutions in red cells

NUMBER 6, DECEMBER, 1968

855 FRITZ BAUMANN. Slow and spike potentials recorded from retinula cells of the honeybee drone in response to light

876 EUGENE Y. BERGER, F. RENÉ PECIKYAN, and GRACE KANZAKI. Anesthetic gases and water structure. The effect of xenon on tritiated water flux across the gut

887 R. I. BIRKS, P. G. R. BURSTYN, and D. R. FIRTH. The form of sodium-calcium competition at the frog myoneural junction

908 AKIRA WATANABE, SHOSAKU OBARA, and TOYOHIRO AKIYAMA. Inhibitory synapses on pacemaker neurons in the heart ganglion of a stomatopod, *Squilla oratoria*

925 L. GIRARDIER, J. SEYDOUX, and T. CLAUSEN. Membrane potential of brown adipose tissue. A suggested mechanism for the regulation of thermogenesis

941 G. T. RICH, R. I. SHA'AFI, A. ROMUALDEZ, and A. K. SOLOMON. Effect of osmolality on the hydraulic permeability coefficient of red cells

955 FRANKLIN FUCHS, EDWARD W. GERTZ, and F. NORMAN BRIGGS. The effect of quinidine on calcium accumulation by isolated sarcoplasmic reticulum of skeletal and cardiac muscle

969 LESLIE E. BAILEY and PETER E. DRESEL. Correlation of contractile force with a calcium pool in the isolated cat heart

983 LETTERS TO THE EDITOR

S. MCLAUGHLIN. The activity coefficient of sodium in striated muscle fibers

F. J. BRINLEY, JR. Intracellular sodium concentration and activity coefficient in single barnacle muscle fibers
